Identify, Aggregate, and Visualize Your Data

We know that data and platform management can be a daunting task for any business. From companies who just need a little support to those who need a total overhaul, we provide experienced developers, engineers, and data scientists to address the needs of a variety of businesses.

Aggregation

Building data pipelines into a centralized database or data warehouse

Automation

Developing resuable templates to streamline processes

Visualization

Building code to streamline the data flows and reports

Unique Solutions Based On Your Needs

Fulcrum's Data Anomaly Detector

Identifying unusual patterns in live data feeds with Fulcrum's ML-driven Data Anomaly Detector. We apply cutting edge machine learning applications and data visualization to information technology systems historically run by SQL logic. It requires minimal user input or oversight, and becomes more effective as the user interacts with it by leveraging a blend of user context knowledge and machine learning methodology to automatically hone in on outliers and less obvious long-term trends or patterns in data.

Managed Hosting with Fulcrum Anvil

Fulcrum Anvil is a scalable, secure, and reliable cloud infrastructure solution with best-in-class managed services. It can be run on Amazon Web Services, Microsoft Azure, Google Cloud Platform or our own OpenStack platform, the leading open source private cloud platform, offering technologies ranging from server virtualization, database servers, and Hadoop big data services, to Docker containers, Kubernetes, micro services, and GPU processing.

A Modern Data Science Consulting Partner

Fulcrum is known for our 26 year history as a boutique data science consulting firm, but our success is built on a broader approach and vision. We collaborate with clients to accelerate their use of data and advanced analytics, build their organizational capacity for data-driven decision making, and push the frontiers of what's possible within their organization.

Easy & Fast

Get started ASAP. Just sign up for a team and we are sitting next to you, rolling up our sleeves, and making progress.

Customizable

We know that your needs can change — specialists swap in and out as needed for different aspects of the solution.

Low Risk

Did we mention that you can try for 3 months at a discounted rate? No obligation and you can choose to terminate at anytime.

Domain Expertise

25+ years of experience in industries such as banking, insurance, and retail — giving us the skill and knowledge to tackle even the toughest problems.

Our Approach Consists of Three Pillars

Full Stream Analytics

Upstream: We give attention to data collection, cleanliness, timeliness, and augmentation.
Midstream: We factor in maintainability, explainability, and credibility.
Downstream: We consider how insights are visualized, explained, measured, and integrated with operational systems to drive intelligent actions.

Fluid Roadmaps

We help develop tactical plans that align with, and inform, an organization's strategic goals, identify and quantify the gaps between these goals and their capabilities and then prioritize and sequence opportunities based on these factors while maintaining the flexibility to pivot and adapt to changing needs over time.

Augmented Analytics Capabilities

We expand organizational capacity by supplementing internal resources, skills and experience to provide rapid augmentation as needed while fostering interal growth of an organizations data capabilities, knowledge, infrastructure, processes, and human capital through training and recruitment.
