

Anvil: Web Hosting with Best-In-Class Managed Services

Fulcrum Anvil can be run on Amazon Web Services, Microsoft Azure, Google Cloud Platform or our own OpenStack platform, the leading open source private cloud platform. We offer technologies such as server virtualization, database servers, Hadoop big data services, Docker containers, Kubernetes, micro services, and GPU processing.

Widely Trusted

The Anvil cloud platform hosts data science applications and big data environments for Fortune 100 and Fortune 500 companies.

Managed by Experts

Managed by network and system administrators with decades of experience and expertise in virtual technology, networking, and security.

Enhance with Analytics

Utilize Piwik Pro and Matomo Analytics as a web analytics platform to track site visits and user interactions.

Built for Hosting Web Applications

Scalable

Anvil can scale up to terabytes of RAM, petabytes of storage and thousands of vCPU or can be scaled infinitely utilizing AWS. Highly visible and high transaction applications run within Fulcrum's 99.99% uptime Service Level Agreement.

Secure

Anvil is built to the NIST standards of Cybersecurity and is PCI DSS and HIPAA compliant. For public cloud instances, Fulcrum maintains a semi-annual SOC audit review.

Reliable

Anvil is monitored 24/7/365 by Operations and Infrastructure teams at the host level, to ensure that all machines and services are running as expected, and with third-party web monitoring from testing sites around the world to test complex interactions with websites.

A Modern Data Science Consulting Partner

Fulcrum is known for our 26 year history as a boutique data science consulting firm, but our success is built on a broader approach and vision. We collaborate with clients to accelerate their use of data and advanced analytics, build their organizational capacity for data-driven decision making, and push the frontiers of what's possible within their organization.

Easy & Fast

Get started ASAP. Just sign up for a team and we are sitting next to you, rolling up our sleeves, and making progress.

Customizable

We know that your needs can change — specialists swap in and out as needed for different aspects of the solution.

Low Risk

Did we mention that you can try for 3 months at a discounted rate? No obligation and you can choose to terminate at anytime.

Domain Expertise

25+ years of experience in industries such as banking, insurance, and retail — giving us the skill and knowledge to tackle even the toughest problems.

Our Approach Consists of Three Pillars

Full Stream Analytics

Upstream: We give attention to data collection, cleanliness, timeliness, and augmentation.

Midstream: We factor in maintainability, explainability, and credibility.

Downstream: We consider how insights are visualized, explained, measured, and integrated with operational systems to drive intelligent actions.

Fluid Roadmaps

We help develop tactical plans that align with, and inform, an organization's strategic goals, identify and quantify the gaps between these goals and their capabilities and then prioritize and sequence opportunities based on these factors while maintaining the flexibility to pivot and adapt to changing needs over time.

Augmented Analytics Capabilities

We expand organizational capacity by supplementing internal resources, skills and experience to provide rapid augmentation as needed while fostering internal growth of an organizations data capabilities, knowledge, infrastructure, processes, and human capital through training and recruitment.
